BRONZE LIFT

BROCHURE

# XH Series

XH Series is the Bronze Lift hydraulic line for freight, goods and service lifts: three models reaching 1,000, 5,000 and 20,000 kg, at speeds up to 0.63 m/s and travel up to 20 m. XH is configured per project instead of from a fixed dimension table, so the shaft, platform and loading arrangement follow the building.

INDUSTRIAL cabin line, A7921 variant — one of the cabin design lines offered for this series.

Document BL-BRO-XH-EN · Rev. 2026-10-22

## Series at a glance

| | |
|---|---|
| XH100 | Speed up to 0.63 m/s · Capacity up to 1,000 kg · Travel up to 20 m · Hydraulic, configured per project |
| XH200 | Speed up to 0.63 m/s · Capacity up to 5,000 kg · Travel up to 20 m · Hydraulic, configured per project |
| XH500 | Speed up to 0.5 m/s · Capacity up to 20,000 kg · Travel up to 20 m · Hydraulic, configured per project |

## Models

### XH100

XH100 is the smallest hydraulic model of the XH Series: capacity up to 1,000 kg, speed up to 0.63 m/s and travel up to 20 m. It is the choice where shaft dimensions and headroom are limited, and it is configured per project instead of from a fixed dimension table.

### XH200

XH200 is the mid load hydraulic model of the XH Series: capacity up to 5,000 kg, speed up to 0.63 m/s and travel up to 20 m. It covers goods and freight duty in industrial buildings and is supplied with the industrial cabin line.

Shopping mall Production Public building

### XH500

XH500 is the heaviest hydraulic model of the XH Series: capacity up to 20,000 kg, speed up to 0.5 m/s and travel up to 20 m. At this load the platform, guide rails and loading arrangement are designed around the project, so the shaft reactions are calculated case by case rather than published as a table.

## Cabin design lines

The renderings show the published variants of each cabin design line. Surface and finish options are specified per model; the dimensions of the car follow the shaft.

### ART DECO

Decorative passenger cabin design in two variants; the wall finishes come from the option matrix of the model it is specified on.

## Conformity and warranty

Bronze Lift designs and supplies lift systems and safety components in accordance with EN 81-20 and EN 81-50, and issues the EU declaration of conformity for the systems it supplies.

All supplied products carry a standard 24-month manufacturer's warranty from the date of delivery.

> For a project-specific proposal, send us the number of floors, the rated load and whether a shaft already exists.
>
> The complete dimension tables — car, door, shaft, headroom and pit — are in the fact sheet.

Catalogue data is indicative planning information and is not a commitment. Obtain confirmation from the engineering department before using these values in a specification or shaft design.
