

BRONZE LIFT

XH Series

The XH series elevator models provides versatile hydraulic solutions suitable for freight, goods, and diverse lifting needs.

Models

XH100

The XH100 model is designed to deliver reliable hydraulic performance in smaller spaces. Ideal for environments where compactness is key, the XH100 combines powerful lifting capabilities with a space-efficient design. This model is the go-to solution for buildings with limited shaft dimensions that still demand robust lifting performance.

- Speed up to 0.63 m/s
- Capacity up to 1,000 kg
- Travel up to 20 m
- Hydraulic, configured per project

Application areas

-  Residential
-  Office
-  Shopping mall
-  Public building

XH200

The XH200 is built to handle more substantial loads while maintaining the space efficiency and reliability that hydraulic systems are known for. This model is versatile enough to be deployed in a variety of settings, from industrial environments to large goods lifts, providing the perfect balance of power and practicality.

- Speed up to 0.63 m/s
- Capacity up to 5,000 kg
- Travel up to 20 m
- Hydraulic, configured per project

Application areas

-  Shopping mall
-  Production
-  Public building

XH500

The XH500 is the powerhouse of the XH series, designed to handle the heaviest loads with absolute reliability. This model is tailored for industrial settings and large-scale operations where strength and endurance are paramount. With its high-capacity and robust design, the XH500 sets the standard for heavy-duty hydraulic lifts.

Speed up to 0.5 m/s

Capacity up to 20,000 kg

Travel up to 20 m

Hydraulic, configured per project

Application areas

-  Production
-  Public building
